

VICTORY

Victory Lighting

The heat and light
technology experts

Victory Lighting Ltd is a manufacturer and supplier of lamps and fittings for lighting, heating and industrial processing.

The company's range literally covers the full spectrum, from UV for curing and hygiene, through LED light bulbs, to infrared sources for comfort heating and industrial processing.

Established 25 years ago, Victory has a great deal of experience and industry knowledge to offer its customers.

Research and development

Victory's R&D team is constantly developing new products and finding new applications for them. Victory is proud to be at the forefront of new, market-leading developments in Infrared and UV products.

Distribution network

With distributors throughout the world and warehouse centres in the UK, USA, Poland, Australia and China, Victory has the capability to get products to where they are needed quickly and efficiently.

Customer service

Victory prides itself in providing the highest levels of customer service. The wealth of product knowledge and industry experience of our customer service team is invaluable in assisting with technical and pricing enquiries, as well as order tracking and stock requests.

Accredited

Victory Lighting is ISO 9001 accredited for both its business in the UK and its production facility in China. The company additionally operates under its own quality policy.

A wide range of infrared heat emitters for comfort heating and industrial applications.

Victory's range of infrared products is second to none, covering every application from people-heaters to lamps for complex industrial processes.

Lamps

Victory Infrared lamps are the chosen heat source for many manufacturers' equipment. They are available in many formats and we can also produce customised products.

Fittings

Victory manufactures a wide range of heaters for commercial and industrial comfort heating as well as personal use.

UV lamps for industrial and print processes including curing and sterilisation.

Ultraviolet light sources have applications in industry, health and hygiene, printing, security and many others.

With over 25 years of experience in specialist lighting, Victory can supply high-quality products for OEMs in these industries. Victory supplies manufacturers throughout the world in over 140 countries.

Light sources for households and commercial buildings.

Victory has its roots in manufacturing incandescent lightbulbs but LED technology is now at the forefront of its lightbulb range which includes decorative and reflector products.

The company also offers LED T8 retrofit tubes for fluorescent lighting.

Product information and datasheets: www.victorylighting.co.uk

Victory 'Heatlight' mobile infrared paint curing systems offer one of the most cost-effective answers to automotive paint drying presently available. There is a wide range of sizes and formats to cater for the smallest to the largest of jobs.

All dryers incorporate the latest technology in short-wave quartz lamps, allowing quick, economical and convenient drying of primers, sealers, top coats, clear lacquers and all water based products.

Applications

Victory Lighting products are used in a vast variety of applications, from domestic heating to large industrial processing equipment. Here are some typical examples:

Infrared warehouse heating

In many situations it is not necessary to heat the warehouse itself - just the people in it. Victory infrared heating just heats objects and people so does not waste energy heating the structure and air.

Thermoforming

Victory has a range of products to supply both long wave and medium wave infrared heat for all manner of industrial heating and thermoforming applications. The range includes lamps in various formats as well as ceramic or quartz heater elements.

PET manufacture

A range of linear quartz lamps created specially for PET manufacturing. They are available with a reflector option that reduces heat loss to the rear, to improve efficiency.

Curing and printing

Victory Lighting has a comprehensive range of Infrared twin tube emitters and medium pressure UV lamps for curing inks, paints, adhesives and resins in many printing and industrial applications.

Custom designed IR

Victory provides bespoke infrared modules and control systems for all kinds of industries. Standard sizes are available from 1kW to 8kW and other sizes can be made to order.
